|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Multiple frequencies of θ^2 Tau: Comparison of ground-based and space measurements by M. Breger | 4 |
| PMS stars as COROT additional targets by M. Marconi, F. Palla and V. Ripepi | 13 |
| The study of pulsating stars from the COROT exoplanet field data by C. Aerts | 20 |
| 10 Aql, a new target for COROT by L. Bigot and W. W. Weiss | 26 |
| Status of the COROT ground-based photometric activities by R. Garrido, P. Amado, A. Moya, V. Costa, A. Rolland, I. Olivares and M. J. Goupil | 42 |
| Mode identification using the exoplanetary camera by R. Garrido, A. Moya, M. J. Goupil, C. Barban, C. van't Veer-Menneret, F. Kupka and U. Heiter | 48 |
| COROT and the late stages of stellar evolution by T. Lebzelter, H. Pikall and F. Kerschbaum | 51 |
| Pulsations of Luminous Blue Variables by E. A. Dorfi and A. Gautschy | 57 |
| By-product of the V1162 Ori multisite campaign: the new δ Scuti star GSC 4778 00324 by P. Lampens, P. van Cauteren, P. Niarchos, K. Gazeas, V. Manimanis, T. Arentoft, P. Wils, A. Bruch, R. Garrido and R. Shobbrook | 65 |
| Strømgren photometry of SX Phe = HD 223065 by A. Stankov, D. Sinachopoulos, E. Elst and M. Breger | 72 |
