<b>1</b>	<b>Introduction</b>	<b>13</b>
<b>2</b>	<b>Decameter Radio Telescopes UTR-2, URAN-2 and GURT</b>	<b>17</b>
2.1	Radio telescope UTR-2 and interferometer URAN . . .	17
2.2	GURT . . . . .	22
2.3	Comparative analysis of solar observations by the single antenna and large array . . . . .	24
2.3.1	Space observations by the WIND/Waves instrument at 9 MHz – 13.8 MHz . . . . .	26
<b>3</b>	<b>Solar Activity</b>	<b>35</b>
3.1	History: the Sun as a goddess . . . . .	35
3.2	First observations of the Sun . . . . .	35
3.3	First scientific observations and measurements . . . . .	37
3.4	Solar phenomena at active regions . . . . .	38
3.5	Explosive events . . . . .	40
<b>4</b>	<b>Radio Emission of the Quiet Sun</b>	<b>43</b>
4.1	Radio emission of the quiet Sun at decameter wavelengths . . . . .	43
4.1.1	Observations of the quiet Sun by URAN-2 . . . . .	46
4.1.2	Observations of the quiet Sun by UTR-2 . . . . .	49
4.2	Sizes and brightness temperature of the quiet Sun at decameter wavelengths . . . . .	51
4.2.1	Radio emission of the quiet Sun at 20 and 25 MHz – sizes and brightness temperatures . . . . .	51
<b>5</b>	<b>Type III Bursts</b>	<b>60</b>
5.1	Introductory remarks . . . . .	60
5.2	Fast Type III bursts . . . . .	65
5.3	Type III bursts with fine time structure . . . . .	72
5.4	Type IIIb . . . . .	74
5.4.1	Observations . . . . .	74
5.5	Powerful Type III bursts . . . . .	78
5.6	Type III bursts with changing sign of drift rate . . . . .	82
5.7	“Dog-leg” Type III bursts at the decameter wavelengths . . . . .	89
5.7.1	Observations . . . . .	90

5.7.2	Interpretation of the observations . . . . .	93
5.8	Decameter Type IIIb-III pairs . . . . .	94
5.8.1	Observations . . . . .	97
5.8.2	Discussion . . . . .	101
5.9	Trios . . . . .	106
5.9.1	Trio of Type IIIb and Type III bursts . . . . .	106
5.10	Spatial sizes and heights of Type III radio emission at the decameter wavelengths . . . . .	113
5.10.1	Sizes of Type III sources and heights of their radio emission at frequencies 20 and 25 MHz . . . . .	113
5.11	Inverted U- and J-bursts . . . . .	121
5.12	Observations of the solar U-bursts harmonic pair with new radio telescope GURT . . . . .	129
<b>6</b>	<b>Type II Bursts</b>	<b>137</b>
6.1	Solar Type II bursts at frequencies 10 MHz - 30 MHz	137
6.1.1	Study of the decameter Type II bursts with rich fine and superfine structures . . . . .	146
6.2	Type II burst with herringbone structures . . . . .	153
6.2.1	Analysis and discussion . . . . .	156
6.3	Tadpoles - a new type of solar radio bursts . . . . .	161
<b>7</b>	<b>Type IV Bursts</b>	<b>169</b>
7.1	Decameter Type IV burst associated with a behind- limb CME observed on November 7, 2013 . . . . .	169
7.1.1	Observations . . . . .	170
7.1.2	Interpretation of the observations . . . . .	173
7.2	Decameter Type IV bursts observed in the years 2003- 2006 . . . . .	178
7.3	Properties of decameter Type IV bursts . . . . .	186
7.4	"Fingerprint" fine structure of decameter Type IV burst	192
7.4.1	Sub-bursts in emission and absorption . . . . .	204
7.5	Oscillations of Type IV bursts . . . . .	208
7.5.1	Quasi-periodic variations of radio emission . . . . .	211
7.6	Absorption bursts . . . . .	218
7.6.1	Observations and their analysis . . . . .	220
7.6.2	Level of absorption . . . . .	224
7.6.3	Size of absorbing region . . . . .	227
<b>8</b>	<b>Drift Pairs Bursts</b>	<b>230</b>
8.1	Properties of decameter drift pairs . . . . .	230
8.1.1	Drift pairs in the decameter range . . . . .	230
8.2	Polarization of drift pairs . . . . .	240

<b>9 S-Bursts</b>	<b>245</b>
9.1 Properties of decameter S-bursts . . . . .	245
9.2 Groups of decameter S-bursts . . . . .	250
9.2.1 Observations . . . . .	251
9.2.2 Analysis of observations . . . . .	253
<b>10 Spikes</b>	<b>257</b>
10.1 Decameter spikes . . . . .	257
10.1.1 Observations . . . . .	257
10.1.2 Dependence of decameter-spike parameters on the location of active regions . . . . .	260
10.2 Storm of decameter spikes . . . . .	263
10.2.1 The storm of decameter spikes during the event of June 14, 2012 . . . . .	263
<b>11 Unusual Solar Bursts</b>	<b>273</b>
11.1 Caterpillar bursts . . . . .	273
11.1.1 Discussion . . . . .	277
11.2 New class of solar bursts with cut-off frequency . . . . .	282
<b>12 Propagation and Radio Emission of Electron Beams in     the Solar Corona</b>	<b>291</b>
<b>13 Radio Seismology of the Outer Solar Corona</b>	<b>295</b>
13.1 Observations and their interpretation . . . . .	297
<b>Bibliography</b>	<b>299</b>
<b>Index</b>	<b>326</b>
