## I) The Implementation of UNESCO's MAB programme in Austria

National responsibilities	8
National MAB research	10
Evaluating the research carried out in Austrian biosphere reserves by Daniell Zollner and Michael Jungmeier, ECO	11
Biosphere Reserve Integrated Monitoring (BRIM) by Marina Fischer-Kowalski, University of Klagenfurt, and Karl Reiter, University of Vienna	15
The international conservation category "biosphere reserve" in Austria	18
Possible new additions to the global network of biosphere reserves	20
Lessons and impressions from the biosphere reserve Großes Walsertal: by Josef Türtscher, REGIO chair in the Walsertal	22
Biosphere reserves – requirements and reality	23
Biosphere reserves – opportunities in the age of globalisation	26
Why a biosphere reserve in the Vienna Woods? by Gerfried Koch, provincial government of Lower Austria	29
Biosphere reserves as early warning systems for environmental change	30
The relevance of biosphere reserves in mountain ecosystems Interview with Thomas Schaaf, UNESCO	32

## II) The Austrian biosphere reserves

Neusiedler See	34
Lower Lobau	40
Gossenköllesee	44
Gurgler Kamm	48
Großes Walsertal	54
Vienna Woods	60

## III) Best-practice examples

Participation processes	64
Sustainable regional development in the Großes Walsertal	68
(Environmental) Education in the Großes Walsertal	72
Biosphere reserves: instruments for the integration of diverse conservation categories – example Neusiedler See (Burgenland)	75
Research and environmental monitoring in biosphere reserves	78
Land-use conflicts	83

## IV) Appendix

Protected area categories in Austria	86
List of acronyms	91
Glossary	92
Literature	93
The worldwide network of biosphere reserves	94
Imprint	96
